SUBJECT: FOC Requirements for Contractor Technical Service Personnel During FY-1961

TO: Contracting Officer

The following represents FOC's requirements for technical services in support of FY-1961 operations:

- a. Lockheed (SC-58): Four aircraft technical representatives will be required, as well as one Lear field engineer, in support of the autopilot system.
- b. Ramo-Wooldridge (HF-A-104): Two engineers and three technicians will be required by Laughlin. In addition, IPC will require the continued services of engineer, [redacted] at USAFE and of technician, [redacted] (replacement for [redacted]) at FEAF. The 15% domestic dislocation allowance should be eliminated from this contract.
- c. Hycon (HTR-88): Two senior field service engineers will be required.
- d. Perkin-Elmer (TR-57): One field service engineer will be required.
- e. Firewal (HF-AP-1940): The services of [redacted] senior service coordinator, will be required.
- f. Westinghouse (HF-8142): Four contract technical service personnel will be required.

It is requested that appropriate action be taken to contractually cover the technical services outlined above for FY-1961. Initial fund allotments in support of tech rep and other FOC contracts are being forwarded by separate letter.
